

Dear friends of FCC, It has been brought to my attention that the NAB is trying to block XM radio's ability to bring traffic and weather reports to their service.

I must disagree with this effort by the NAB.

I travel with my family on occasion and our transportation of choice is by car and with the car we bring our XM radio.

When I am in Tampa or Orlando I don't know the area well enough to know what radio station supplies traffic report or when they have those reports. With my XM radio installed I can easily switch to the Tampa traffic and weather and receive instant information.

I feel this is a much needed service and in the case of sudden weather changes while traveling it could be life saving.

Thank you for your time and please don't stifle this great technology.
